DISTRIBUTION OF THIS DOCUMENT IS UNLIMITED

This preliminary cruise report contains information that all GABEX participants may find useful, especially the organization of sections and maps.

We have tried to look at the organization of the cruises in a variety of ways all of which are presented in the following. Examples of standard plots are also included along with information on how to specify plots you may need.

Temperature and salinity printouts are not included to save paper. They are available to anyone but it would be easier if you requested specific stations, sections or maps. The nutrient, chlorophyll and dissolved oxygen data are not yet entered into the data set so if you need those data make specific requests. We expect all data to be fully merged by mid-August when the full station lists can be made.

Station log listings for the EASTWARD and ISELIN are included. (Appendices 1 and 2.)

The first two figures (Figures 1 and 2) show the cruise tracks for each ship. This is more for the humor than anything. It clearly show that the ISELIN was following events while the EASTWARD was running a set grid.

The data are broken up into maps and sections which consist of data from one ship usually but not always,

The ISELIN ran 24 sections (Figure 3 and Table 1). Most sections were trans-shelf although some were run along-shore at the 60 m isobath. When you refer to a section include the ship name, re. ISELIN Section 4. The table gives the station numbers that make up a section or map.

The 60 m isobath runs (Figure 4 and Table 2) consists of three ISELIN sections and one EASTWARD section. Initial temperature plots indicate that the individual sections cannot be combined. This is because shelfbreak events propagate north ca. .8 knot.

The EASTWARD was running a standard grid of stations so grid numbers were established. Thus most EASTWARD stations are identified by both consecutive number as well as grid number. Figure 5 shows the standard grid.

The EASTWARD ran 20 sections (Figure 6 and Table 3) one of which was partly alongshore on the 60 m isobath.

The St. Augustine section ( $30.0^{\circ}\text{N}$ ) was occupied 11 times (including one EASTWARD section that was 5 n.m. south). The standard section is stations 13-25 in Figure 5. Table 4 contains relevant data.

Maps were made at the shelfbreak in our effort to detect upwelling events. The resulting data from 9 maps applicable mostly to surface data. Maps 1-7 contain only ISELIN data while 8 and 9 also include EASTWARD data. Figures 7-15 and Table 5 show the maps.

The EASTWARD data were arranged into three maps, two of which contain ISELIN data (Figures 16-18, Table 6).

Another way to organize the data are by time-latitude plots. Figure 19 shows the EASTWARD stations plotted in this way with section numbers included. ISELIN cross shelf sections are indicated in Figure 20 and the 60 m isobath runs in Figure 21. The composite maps are shown in Figure 22.

#### NASA Flights

The U-2 and C-130 made flights on 15 April. Figure 23 shows the flight track and Figure 24 shows the latitude/time plot for the flight and coincident ISELIN stations. Tracks and turn points are given in Tables 7 and 8.

#### Coast Guard Flights

To follow.

#### Standardized Plotting

To assure uniform and comparable plots I suggest that you use, if possible, the standard products we can supply.

#### Cross-Shelf Transects

We are plotting these on a standard 200 m deep by 160 km section. The two reduced examples show a standard plot with sampling points marked. The latter may be particularly useful for much of the shipboard subsurface sampling. We can supply either type plotted by standard pen on bond (for contouring, etc.) or Leroy on tracing paper for photo quality. Specify the section you want plotted by section number and ship. Contact Bill Chandler for these plots (912-356-2459).

#### Horizontals

Horizontal plots will be done on at least two scales:  $28-32^{\circ}\text{N}$ ,  $79-82^{\circ}\text{W}$  and  $28.5-32^{\circ}\text{N}$ ,  $79.5-80.5^{\circ}\text{W}$ . Samples are enclosed.

## TABLES

17	New Smyrna	380-390 (1-11)	2334/24/4 - 1036/25/4
18	5 n.m. S. St. Augustine	397-407	1559/25/4 - 0335/26/4
19	5 n.m. S. Brunswick	417-424	1040/26/4 - 1923/26/4
20	10 n.m. N. Brunswick	429-432	2237/26/4 - 0126/27/4

Table 4. ST. AUGUSTINE TIME SERIES

Both CI and EZ occupied the St. Augustine section many times.

Following is a composite time series section list.

<u>Ship</u>	<u>Section</u>	<u>Grid Stations</u>	<u>Time Interval</u>
CI	2	13-18	0800/12/4 - 1746/12/4
EZ	2	17-25	1811/12/4 - 0205/13/4
CI	3	13-18	1850/12/4 - 2100/12/4
CI	4	13-18	0715/13/4 - 1642/13/4
EZ	5	13-25	0804/15/4 - 2318/15/4
EZ	7	13-25	2211/16/4 - 0907/17/4
EZ	10	13-25	1435/19/4 - 0231/20/4
EZ	12	13-25	0517/21/4 - 1702/21/4
CI	18	13-18	2010/22/4 - 0400/23/4
EZ	15	13-25	2145/23/4 - 0907/24/4
EZ	18*		1559/25/4 - 0335/26/4

\*Section 5 miles south of St. Augustine.

Table 5. COMPOSITE MAPPING RUNS

<u>MAP</u>	<u>STATIONS</u>	
	<u>ISELIN</u>	<u>EASTWARD</u>
1	1-18	
2	49-59	
3	86-144	
4	160-198	
5	195-236	
6	228-269	
7	269-299	
8	295-323	344-356
		364-374
		380-390
9	324-351	401-423

Table 6. EASTWARD MAPS

The Eastward stations can be used in various ways to create maps. The combination we have chosen is as follows:

<u>Map</u>	<u>Sections</u>	<u>Stations</u>	<u>Time Interval</u>
1*	1-4	31-92	0357/12/4 - 1305/14/4
	CI 5	72-89	14 - 15/4
2†	6-9	132-212	0912/16/4 - 0216/19/4
	CI 6	139-144	16/4
3	1-4	245-331	1034/20/4 - 0908/23/4

\*Because of weather the EZ could not complete sections. CI ran full section on 14-15 April (Stations 72-89) which could be added to complete section.

†Add ISELIN C. Canaveral section 6 (stations 139-144 on 16/4).

Table 7. C-130 April 15, 1980 Afternoon

Appendix 1

ISELIN STATION LOG LIST

The letter in the station name (column 2) refers to:

c = CTD Cost

x = XBT Cost

h = horizontal mapping run station

t = " " " "

ISELIN station numbers (column 1) and station name (column 2) are identical except for the added letter in the station name.

EASTWARD station names refer to standard grid locations when they are c or x stations. When station names are t they refer to consecutive station numbers that coincide with the station number (column 1).

# = disc record #

Station = assigned station number

Latitude and longitude

Date and time in eastern standard time

Z = water depth in meters

WVD = wave direction

SS = SEA STATE

WND = wind direction

WS = Wind Speed(knots)

B.P. = barometric pressure in millibars(tens, units and tenths only)

AT = air temp in F(not very good #)

W = WMO weather code

999's indicate no data

Appendix 2

EASTWARD STATION LOG LIST

# = disc record #

Station = assigned station number

Latitude and Longitude

Date and time in eastern standard time

Z = water depth in meters

WVD = wave direction

SS = SEA STATE

WND = wind direction

WS = Wind Speed(knots)

B.P. = barometric pressure in millibars(tens, units and tenths only)

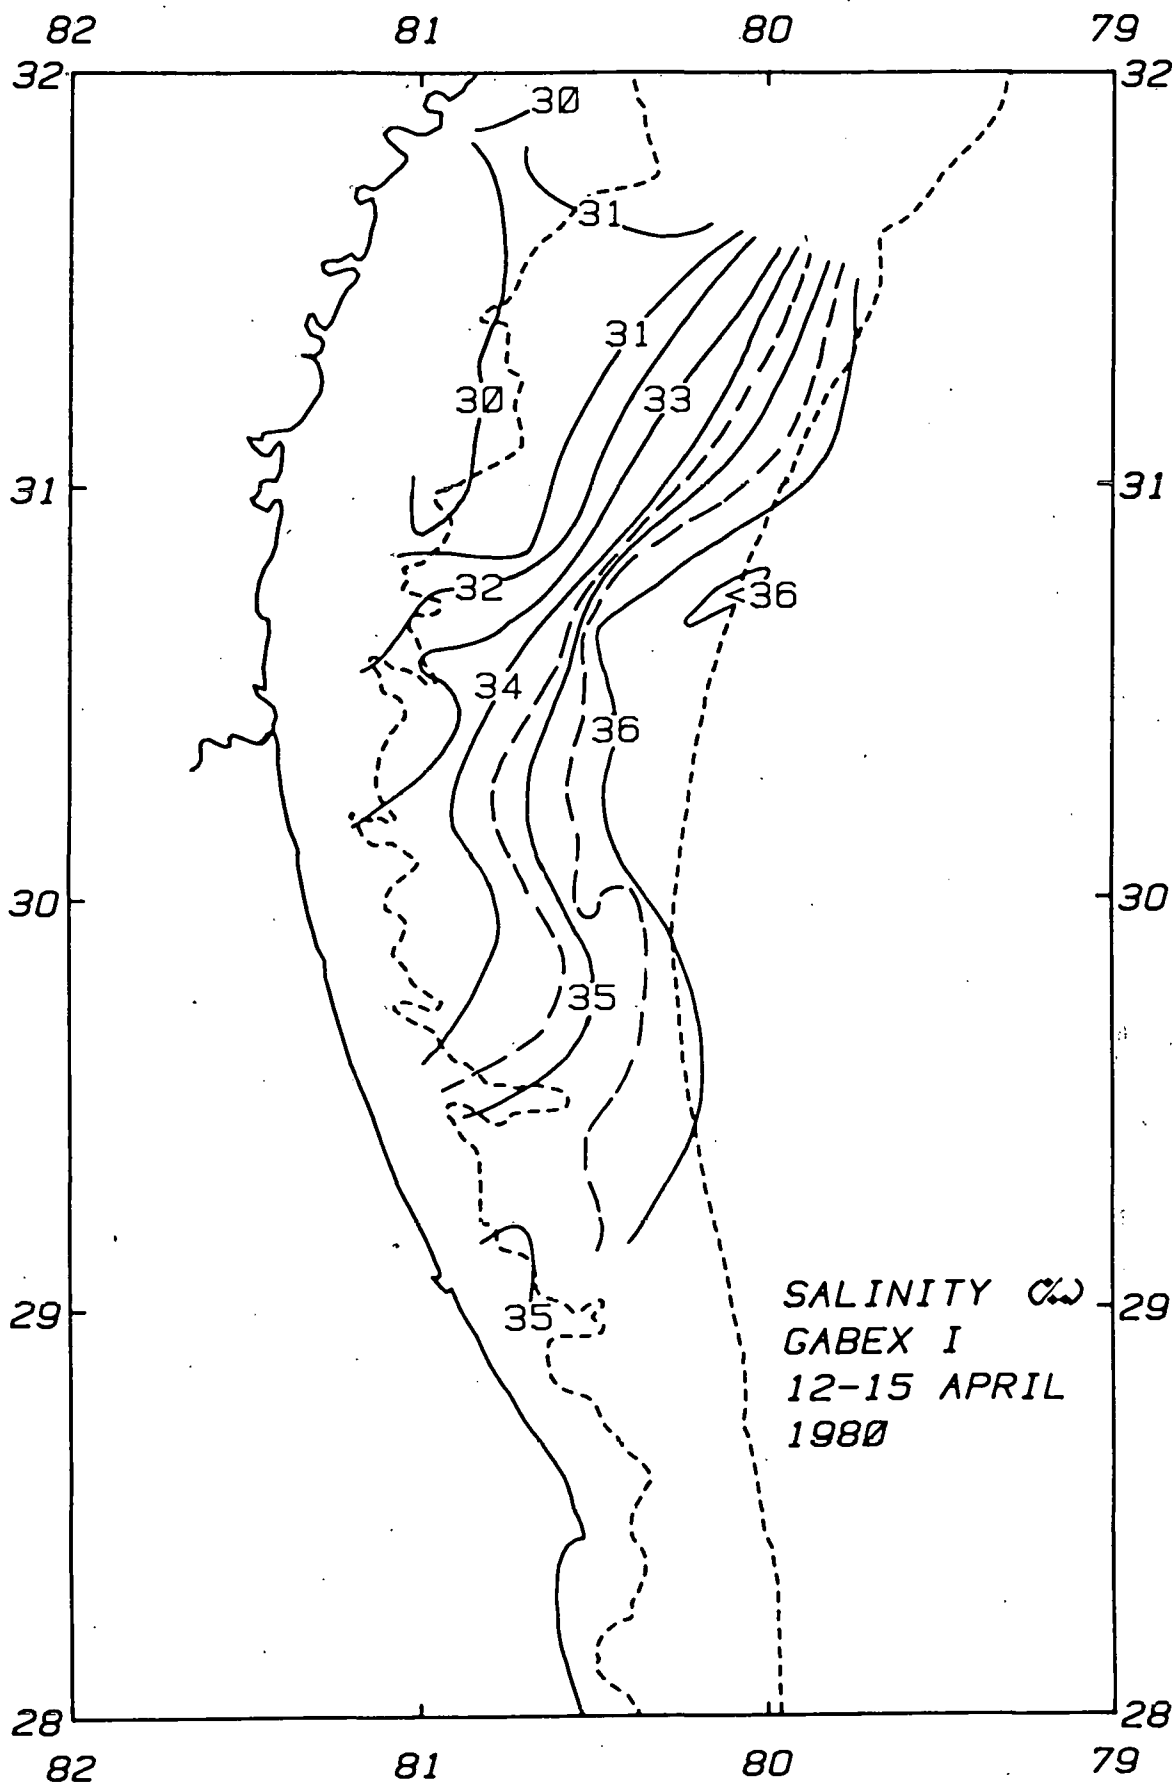

AT = air temp in F(not very good #)

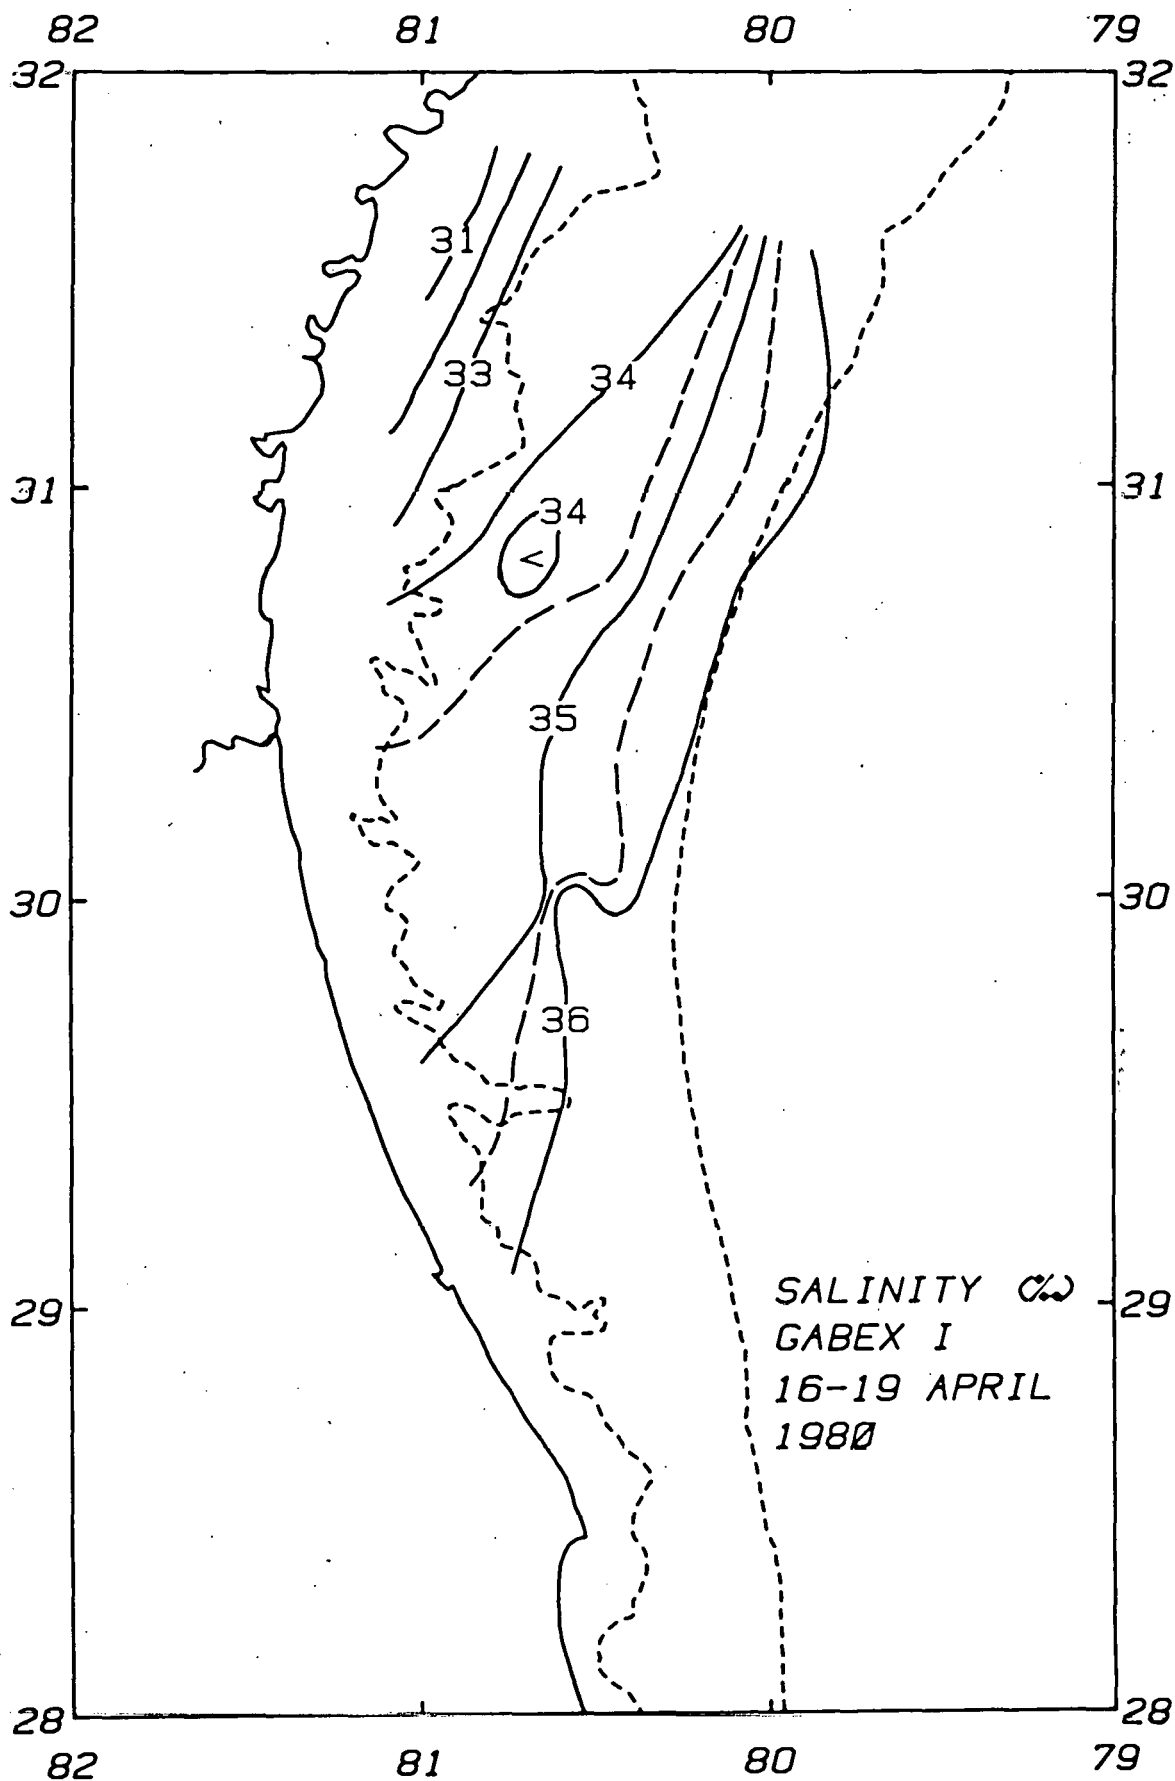

W = WMO weather code

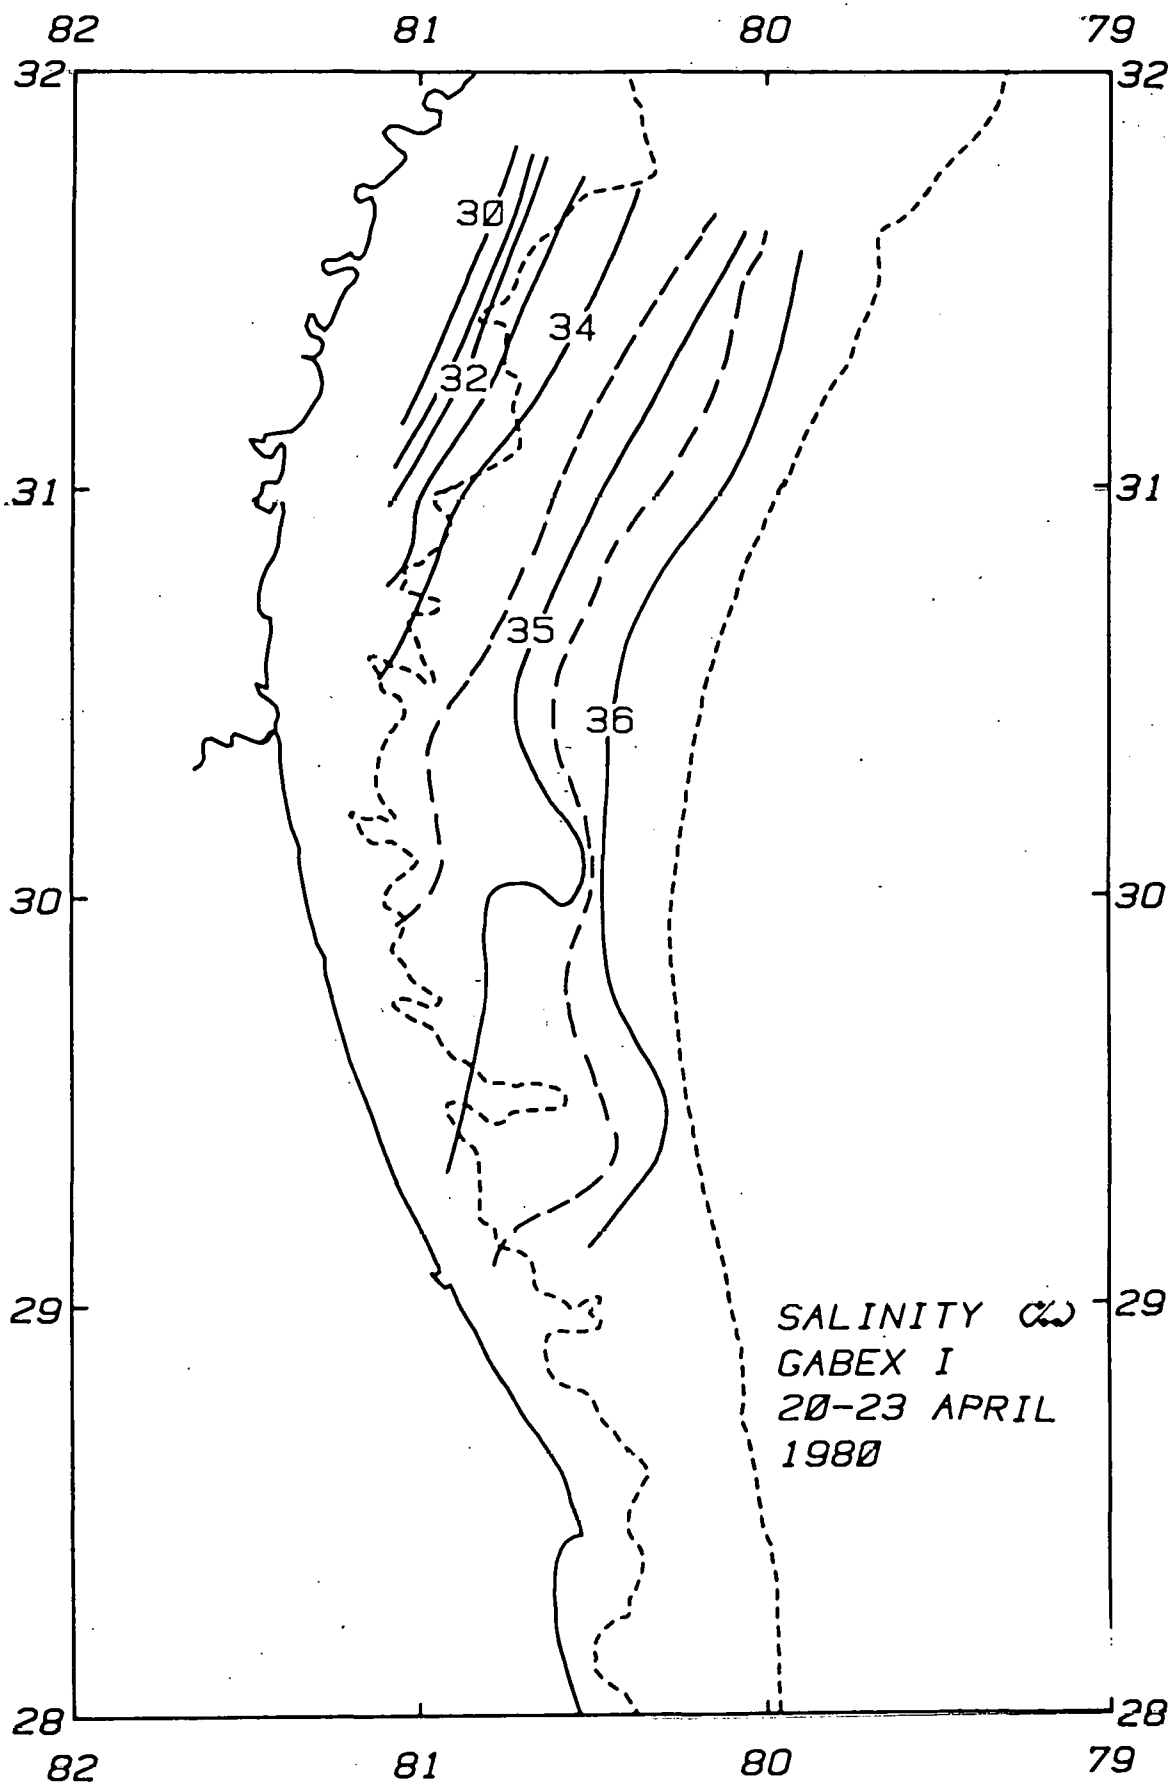

999's indicate no data
